## PROFILE

I'm currently studying full-stack software development at Take 2. I've mainly been working with JavaScript and it's libraries / frameworks like react and express, and I've learnt how to use document-oriented and object-relational databases like MongoDB and PostgreSQL. Outside of tech I have a deep passion for exploring, gaming and growing.

## SKILLS

- Backend Development.
- FrontEnd Development.
- Database Management.
- Version Control.
- Using multiple operating systems (mac & linux).
- Refactoring.
- Leadership abilities.

## EXPERIENCE

### STUDENT DEVELOPER

Take 2

Jan 2024 - Jan 2025

- Build interactive web applications using JavaScript.
- Build scale-able web applications using React.
- Build API's using an application framework called express to perform CRUD operations by manipulating data between a back-end and a client-side server.
- Create databases using PostgreSQL and MongoDB.

## EDUCATION
